

Tour of machine learning and artificial intelligence activities at SU

Prof Hugo Touchette
Applied Mathematics
Stellenbosch University

htouchette@sun.ac.za

UNIVERSITEIT
iYUNIVESITHI
STELLENBOSCH
UNIVERSITY

1918 · 2018

What is machine learning?

Classification

- Supervised
- Unsupervised

Neural networks

- Feedforward NN
- Auto-encoders
- Convolution NN
- Recurrent NN

Reinforcement learning

Why now?

- Availability of data
- Computational power
- Packages: Keras, TensorFlow

ML/AI at SU

Engineering

- Andries Engelbrecht (data science, swarm dynamics)
- Herman Kamper (language processing)

Computer science

- Steve Kroon (neural networks)
- Trienko Grobler (remote sensing)

Applied maths

- Willie Brink (machine vision)
- Hanno Coetzer (biometric)

Statistics

Centre for Artificial Intelligence Research

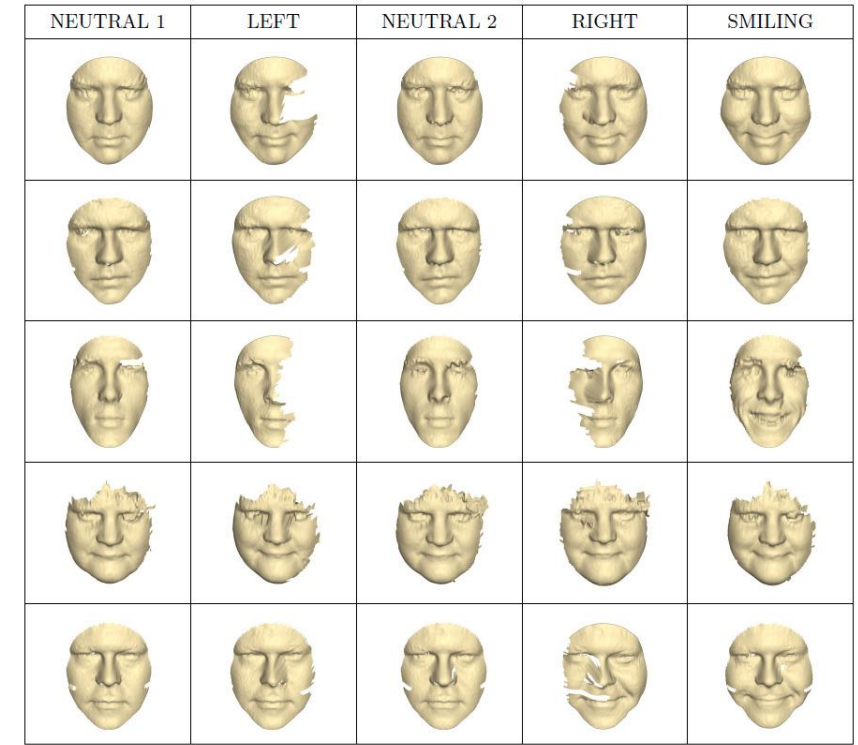

Maties Machine Learning
<https://mml.sun.ac.za>

Machine vision

Willie Brink

wbrink@sun.ac.za

Hanno Coetzer

jcoetzer@sun.ac.za

- Biometric identification
- Image processing
- Ecological applications

Projects

<i>Protea burchellii</i>	<i>Protea lorea</i>
  	  
<i>P. neriifolia</i>	<i>P. cynaroides</i>
<i>Protea laurifolia</i>	<i>Protea neriifolia</i>

Examples of elephants.

Examples of not-elephants.

Natural language processing

Herman Kamper

kamperh@sun.ac.za

Projects

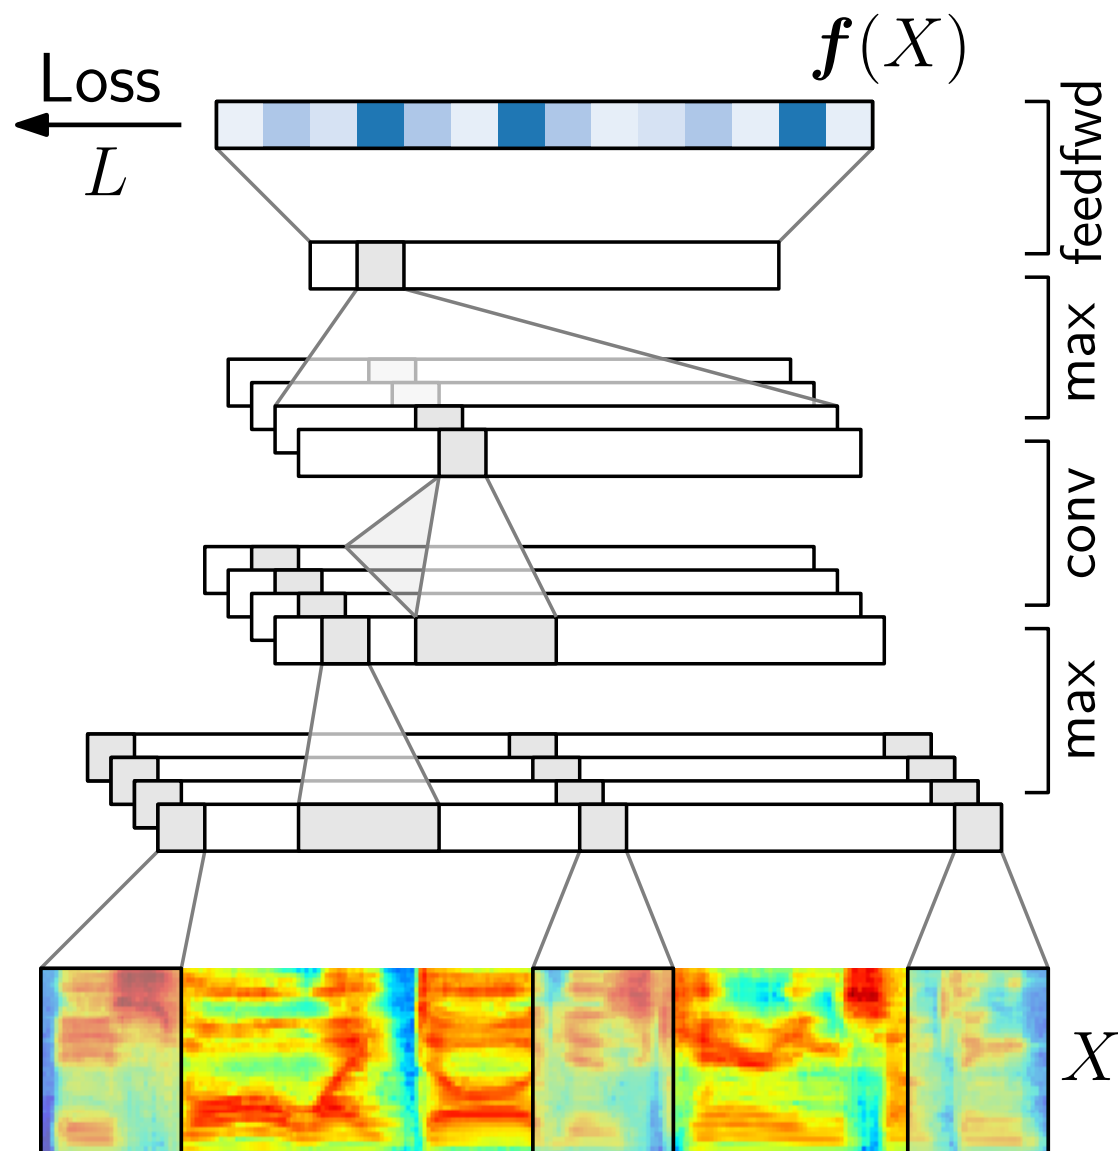

- Speech to text processing
- Low resource speech processing
- No labels, images as labels
- Unwritten languages

Automatic
segmentation

Projects

Neural networks

Projects

- Training algorithms
- Initialisation
- Regularisations
- Linear auto-encoders
- Information propagation

Steve Kroon

kroon@sun.ac.za

$$\mathbf{x} + \epsilon = \tilde{\mathbf{x}} \quad \tilde{\mathbf{z}} = \phi(W_1 \tilde{\mathbf{x}}) \quad \hat{\mathbf{x}} = W_2 \tilde{\mathbf{z}}$$

Prediction and simulations

Projects

- Stochastic modelling
- Trajectory simulations
- Rare event prediction
- Financial prediction
- Artificial generation
- Recurrent NNs, VAEs

Teaching

Courses offered

- Statistics
- Machine vision
- Natural language processing
- Neural networks
- Statistical pattern recognition
- Time series
- Markov processes

Future offering

- BSc Data Science
- MSc ML/AI

MSc ML/AI

- 1 year structured Masters
- Springboard for industry
- Can lead to PhD
- Developed with Ulrich Paquet (DeepMind Google)

Modules

- Maths for ML
- Foundations of deep learning
- Computer vision
- Natural language processing
- Probabilistic modelling
- Reinforcement learning

ML/AI in Africa

Deep Learning Indaba

- 2018: Stellenbosch
- 2019: Nairobi, Kenya

IndabaX

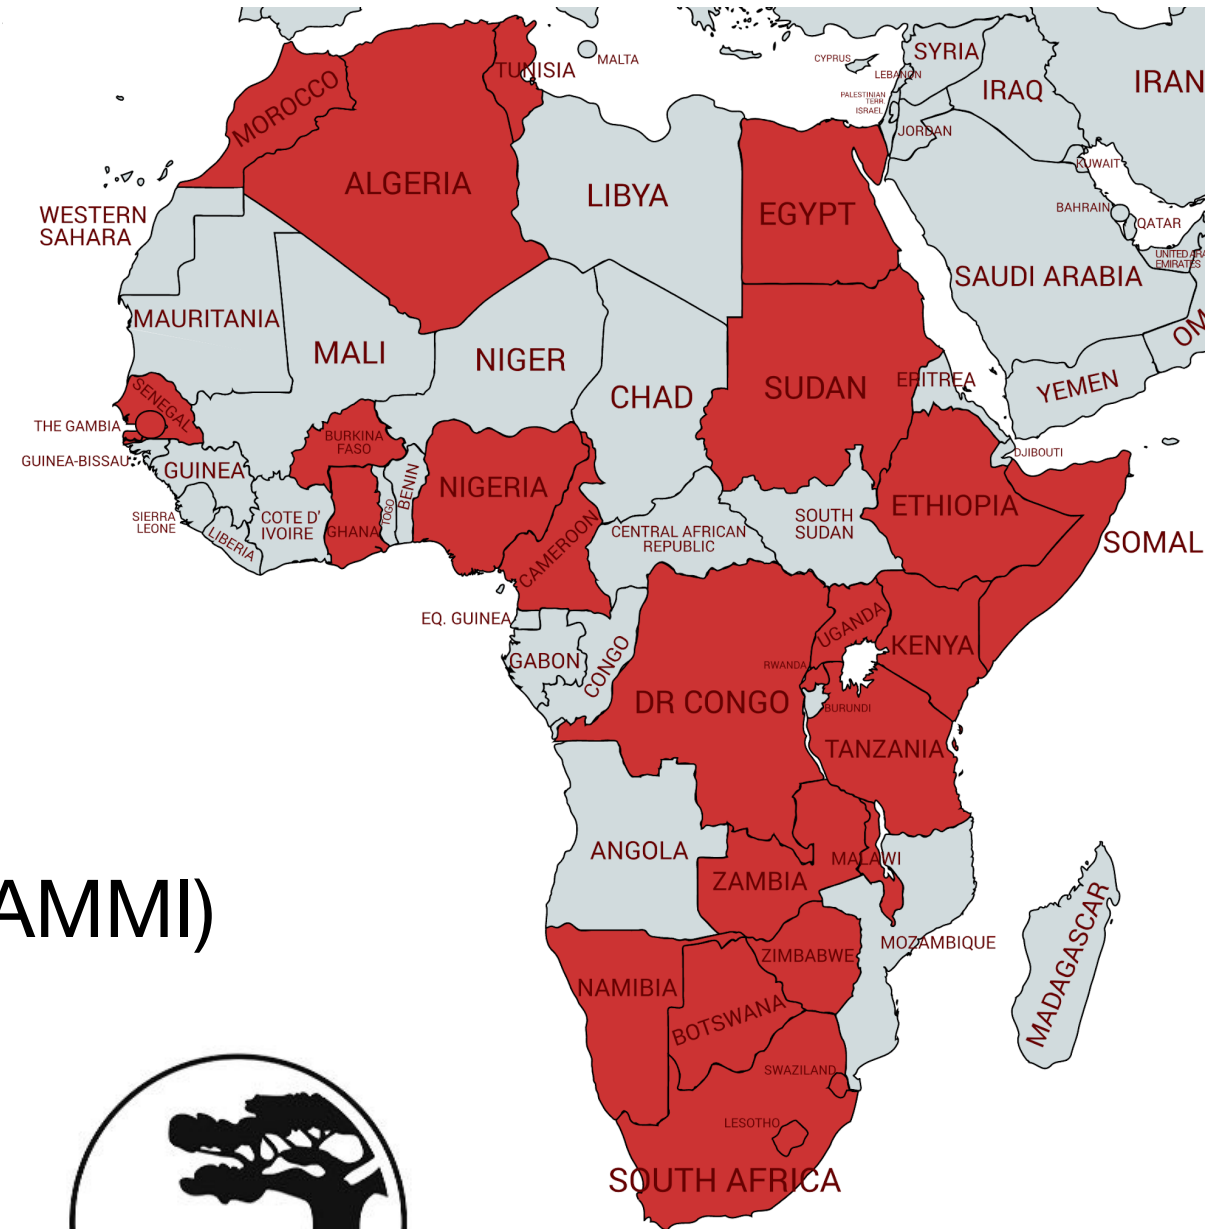

MLDS Africa

AIMS Rwanda

- African MSc Machine Intelligence (AMMI)

Companies

- Amazon (Cape Town)
- Google (Ghana)
- Praelaxis (Stellenbosch)
- Aerobotics (Cape Town)

**DEEP LEARNING
INDABA**

Partnerships

- Technical courses
 - R, Python
 - Data science
 - ML, neural nets
 - TensorFlow, Keras, etc.
- Networking
 - IndabaX
 - MLDS Africa
 - Local startups
- Research collaborations
- Consultancy
- Advisory board
- Scholarships
- Internships
- Support for visitors
- Course suggestions

SU School of Data Science

- Inter faculty school
- Space for DS activities
- Launch: July 2019
