The background of the slide is a blurred image of a financial market data screen. It features various stock indices and their values, such as 'OMX COPENHAGEN 25 INDEX' with a value of 10847.17, 'OMXRG1' with 6025.9680, and 'OMX18' with 27956.04. There are also line graphs showing price fluctuations and 'Buy' or 'Sell' indicators. The overall color scheme is dark with blue and red highlights.

# Inverting loadshedding with Solar PV and Battery Storage

- Introduction
- PV system research at Stellenbosch
  - Modelling
  - Measurement & Development
  - Forecasting
- Hybrid systems research
- Inverting loadshedding - PV & batteries
  - Terminology – inverter, power and energy
  - Determine your load
  - Sizing your battery for loadshedding
  - Generate your own power with PV

# Dr. Arnold J Rix

- 2004 B.Eng at University of Stellenbosch
- 2011 PhD at University of Stellenbosch
- 2011 Project Engineer / Manager at I-Wec
- 2013 Project Development Manager at Gestamp
- 2015 Scatec Solar chair in photovoltaic systems

to present

## Scatec

# Introduction

Training sought-after graduate students through industry relevant research projects while providing training and consulting services to the photovoltaic industry.
