When can I start with my data collection?

forward together sonke siya phambili saam vorentoe

You may unfortunately not start with the recruitment of prospective participants, or commence with data collection (interviews, online questionnaires/surveys, focus groups, observations, the collection of institutional data, etc), until such time as:

> the FESC has reviewed your amended application and deemed it to be <u>low risk</u>, and

> a signed institutional permission letter has been obtained from the relevant participating institution/s (where applicable).
